

Here is a proposed plan to determine if the sidewalks and parking lots adequately lit?

We can collect the following features (points, lines and polygon locations) and attributes (information about each location) -

Light Pole

Height in Feet
Wattage
Pole Material
Condition
GPS Date
Comment

Sidewalk

Width in Feet
Surface
Condition
GPS Date
Comment

Parking Lot

Surface
Condition
GPS Date

Comment

We will build this geodatabase together in the [GDB section](#) of this site. But first, a few reminders on things to consider when combining datasets in GIS.
