[RICOH ANNOUNCES G700SE DIGITAL CAMERA WITH BLUETOOTH® AND WI-FI](#)

Complete with wireless data communication capabilities (Wi-Fi) and Bluetooth®, the G700SE uses Global Positioning System (GPS) functions and laser barcode readers. The camera also features a Scandisk card (SD-1), which provides a higher level of security with password-enabled access. By sliding the card into the camera, a user can only read information by entering the correct password.

[CASIO RELEASES COMPACT EXILIM® CAMERA WITH HYBRID GPS](#)

The latest model to join Casio's EXILIM Hi-Zoom lineup, the EX-H20G offers an impressive feature set as well as Casio's state-of-the-art Hybrid GPS technology, which makes the camera perfect for traveling. Thanks to Casio's Hybrid GPS system, the EX-H20G offers ultra-precise location data for the geotagging of photos and videos and is also the first camera able to geotag indoors. Additionally, the EX-H20G can display the user's current location - as well as geotagged photos and videos - on a map which can be viewed right on the camera itself.
