### **ABOUT THE AUTHOR**

#### **Laura M. Levy**

Laura is the founder of Integrated Mapping Strategies, a GPS/GIS consulting business emphasizing geographic fundamentals, hands-on training, and ongoing support. The company empowers clients by integrating strategic thinking and geospatial tools to provide documented, defensible data as the basis for informed decisions. As a former GIS Specialist for BLM Winnemucca, she led efforts to monitor stipulations and daily population figures at the Burning Man event, and continued those efforts in 2008.

This report is a volunteer effort to summarize conversations with many involved (event attendees, managers and philosophers), and to extend previous monitoring efforts for an event and area that continue to intrigue. As always, responsibility for all content lies solely with the author.

Your comments or questions are warmly invited via **[Laura@Spatial-Ed.com](mailto:Laura@Spatial-Ed.com)**
